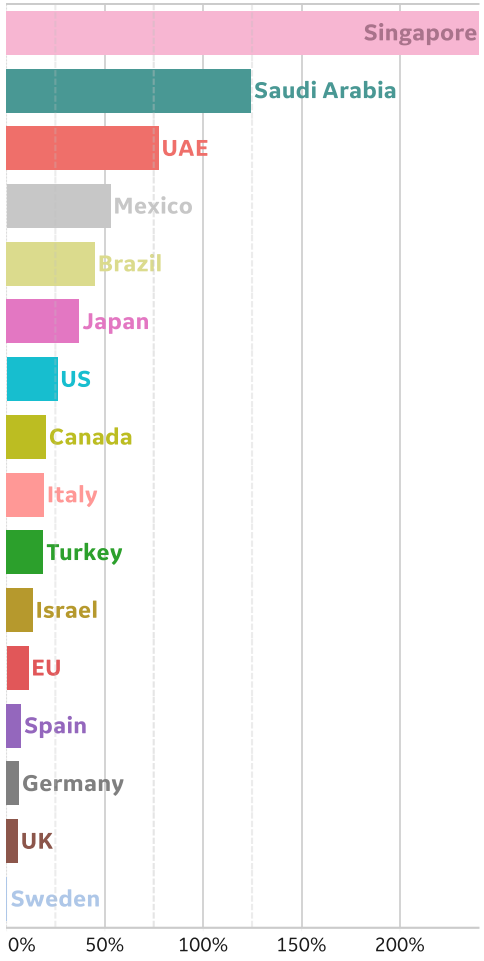
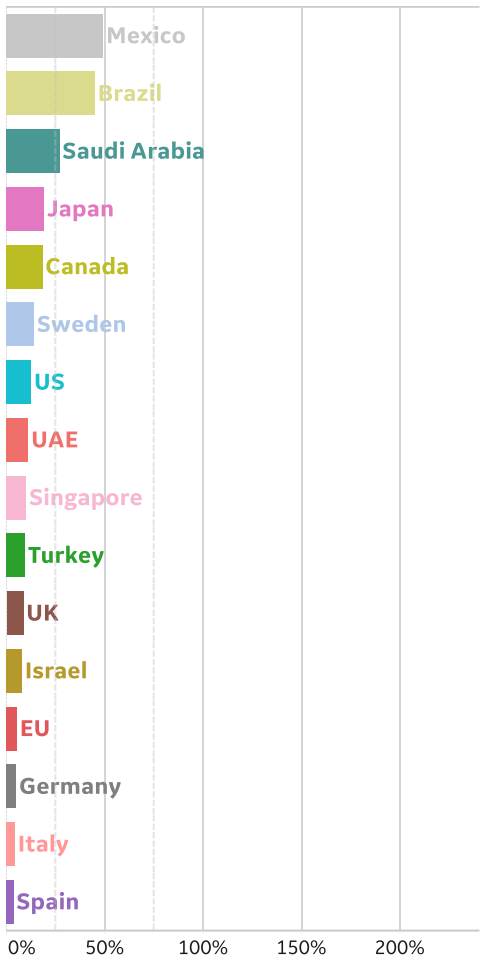
Reported Recoveries



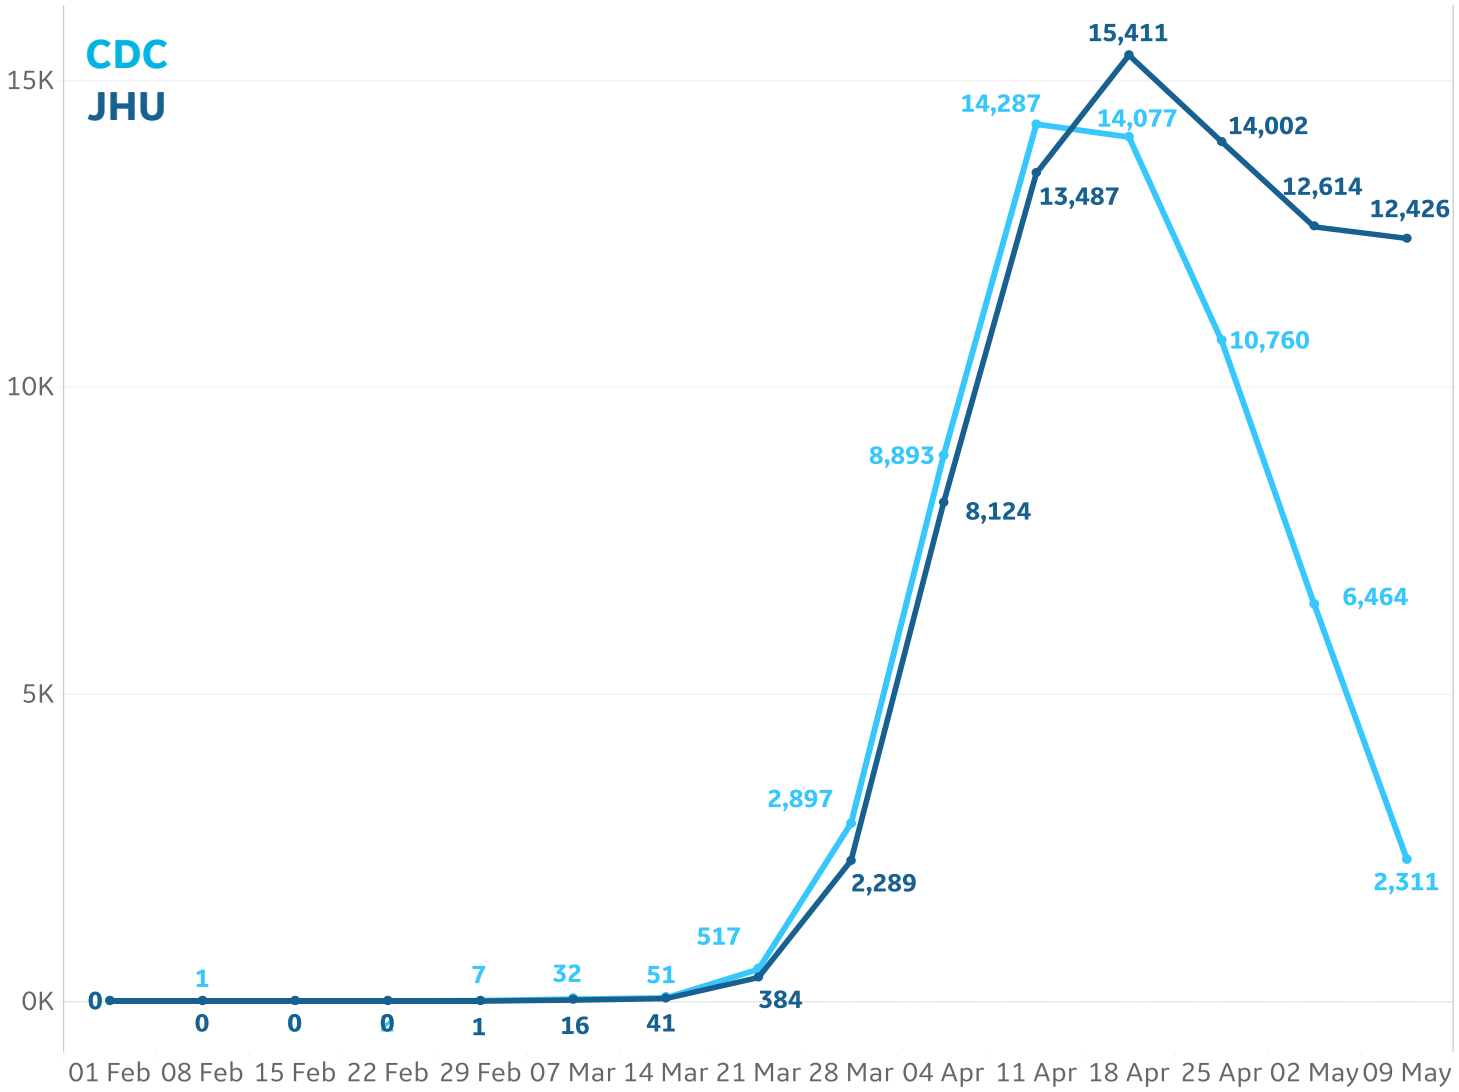
Reported Deaths



Feature: CDC and JHU Reported COVID Deaths

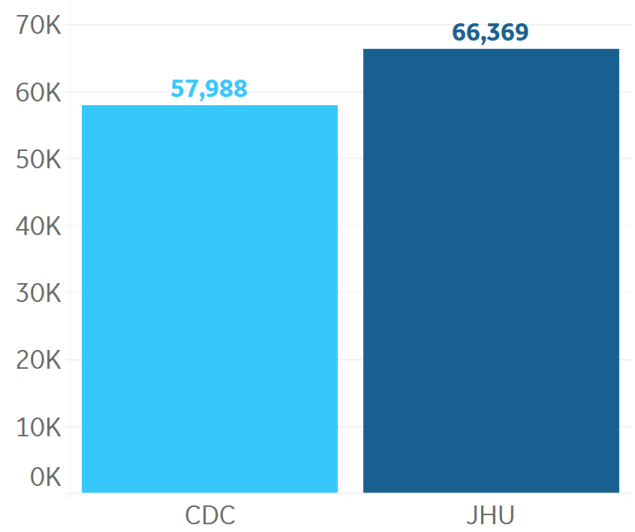
New Deaths by Week

Week 5 – 18



Total Reported Deaths

Week 5-18



The **CDC** death counts include all deaths where COVID-19 is listed on the death certificate as a cause of death, or as a *probable* or *presumed* cause of death.

According to the CDC, reported death counts are **provisional** and lag an average of 1-2 weeks behind other sources, due to:

- Death certificate completion time
- Most COVID-19 deaths are manually coded by NCHS
- Variation in reporting time across states

JHU relies upon publicly available data from multiple sources that do not always agree. More frequent updates of the map often result in higher case numbers than may be available from other sources that are updated less frequently.

Feature: CDC and JHU Reported COVID Deaths

New Deaths by Week in Selected States as Reported by the CDC and JHU

Week 11 – 18

- *Note different axes in each state*
- *Per CDC: Values should not be compared by state due to differences in reporting time*
